## Project Title: Genghis Khan Website

For this assignment, I would like to create a scrolling narrative that the viewer of the site can move through, and be told the story of Genghis Khan and his exploits and achievements. I think that scrolling would lend itself naturally to the flowing nature of a figure's life story. I would like to accompany the story with illustrative work of my own making.

### Events to highlight:

- Birth and childhood
- Rise to prominence in Mongolia, what we know about his society
- Initial conquests and invasions
- Governmental administration and desc. of Mongol imperial society
- Final Conquests
- Death and split of empire
- What happened to his empire after his death
- Summary of his historical impact
